Sydney Metro is Australia’s biggest public transport project.

Services started in May 2019 in the city’s North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street and Barangaroo and new metro platforms under Central.

In 2024, Sydney will have 31 metro railway stations and a 66 km standalone metro railway system – the biggest urban rail project in Australian history. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

The upgrade of the T3 Bankstown Line to metro standards between Sydenham and Bankstown received planning approval on 19 December 2018.

**Sydney Metro will continue to undertake work across its projects in accordance with current Government advice, and will continue to implement social distancing and travel and hygiene measures to protect employees and members of the community. Continuing with these works is critical to ensuring project continuity, and the project team will continue to review and assess activities in line with any further updates.**

Some of this work may be noisy, however we will take every possible step to minimise noise. Access to buildings and driveways will be maintained at all times.

**Bankstown Line metro upgrade**

In May, early work will continue along the T3 Bankstown Line between Sydenham and Campsie stations (weather and site conditions permitting). Access to the rail corridor will be via existing corridor/pedestrian access gates. **Day work will be during project standard construction hours Monday to Friday 7am-6pm and Saturday 8am-6pm.**

### Detail of day work (along rail corridor from Sydenham to Campsie)

**Activities will include:**

- Site establishment work including installation of haul roads and temporary fencing
- Locating and confirming underground services using hand held equipment and non-destructive digging close to and in the rail corridor
- Station investigations and non-intrusive pipe inspections on platforms between Marrickville to Campsie
- Geotechnical/site investigations, tree assessments and topographic/scanning surveys inside the rail corridor and in nearby public areas
- Minor devegetation and clearing throughout the rail corridor where required
- Installation of cable routes and security fencing
- Spoil and waste removal through rail access gates along the rail corridor near Ewert Street (Dulwich Hill), Randall Street and Kays Avenue (Marrickville), Charles, Wairoa, Broughton Street (Canterbury), and South Parade (Campsie)
- Rail embankment work including piling and earthworks between Campsie and Canterbury
- Storage of materials adjacent to Broughton Street, Canterbury
- Cable route work including installation of galvanised steel trenching (GST) in the rail corridor adjacent to Keir Avenue and Ford Avenue, Hurststone Park
- Geotechnical investigations for three new substations at Dulwich Hill, Canterbury and Campsie, including using a trailer with drill rig to take core soil samples and using vacuum trucks to remove excavated soil
- Geotechnical investigations for the new bulk power supply route from the Ausgrid substation in Hughes Park to Campsie Station (please see map overleaf).
### Out-of-hours work

Due to the nature of some activities and for the safety of workers, some work will occur outside standard construction hours when trains are not running. Some equipment will also be delivered outside standard construction hours in line with Transport for NSW requirements for transporting oversized vehicles.

<table>
<thead>
<tr>
<th>Date / time</th>
<th>Detail of work (along the rail corridor from Sydenham to Campsie)</th>
</tr>
</thead>
</table>
| Weeknights  | • Site/geotechnical investigations and surveys inside the rail corridor, on station platforms and in nearby public areas  
• Locating and confirming underground services close to the rail corridor and in nearby public areas  
• Rail embankment work between Campsie and Canterbury for no more than three nights in a row between the hours of 6pm and 9pm |
| During scheduled rail shutdown weekends:  
From 1am Saturday 2 May to 2am Monday 4 May 2020, and from 1am Saturday 23 May to 2am Monday 25 May 2020 | • Site/station investigations, tree assessments and topographic/ scanning surveys in the rail corridor and in nearby public areas  
• CCTV pipe inspections on station platforms between Marrickville to Campsie  
• Installation of fencing in the rail corridor, Marrickville (between Fraser Park and Victoria Road bridge)  
• Rail embankment and earth works between Canterbury and Campsie  
• Rail corridor works adjacent to Broughton Street, Canterbury (near Cooks River). This includes a road closure on Broughton Street rail underbridge section  
• Installation of cable routes and GST in the following locations:  
  o Adjacent to Foord Avenue, Hurlstone Park. This includes a road closure at Foord Avenue rail underbridge section  
  o Cooks River bridge, Canterbury  
  o In the rail corridor adjacent to Lilian Street, Campsie. |

Equipment used for all the above work will include hand held equipment, light vehicles, vacuum suction trucks, mulcher, piling rig, dump trucks, excavators, crane trucks, drilling rig, lifting machinery, elevated work platform, concrete trucks, concrete pumps, rollers, forklift, water cart and power tools.

### Keeping you informed

Properties close to the rail corridor will receive notifications when construction work is scheduled to occur. If you have any questions about the bulk power supply route/ substations please contact us and ask for Grace. For all other works please ask for Melanie. You can contact us on 1800 171 386 (24 hour community information line) or e-mail SouthwestMetro@transport.nsw.gov.au. Thank you for your cooperation while we complete this essential work.
